FINEST WINDOW SOLUTION

OUR VISION

It is a known fact that nature's resources have always been consumed by man from the beginning. Humans destroyed forest for their shelter by cutting trees to obtain wood and timber. It is a great threat to mankind to destroy the world around.

VISION

We at Lingel believe that our products have important roles to play in helping improve people's lives and conserve energy in a world that is growing in population, with ever-increasing demands for water, food, shelter, sanitation, energy, health services and economic security.

**WHO
ARE
WE?**

FINEST WINDOW SOLUTION

Karl Lingel Fensterbau GmbH & Co.KG was established in 1959 in Ellwangen, a small town in Germany and since then Lingel is one of the leading manufacturers of high quality doors and windows in Europe.

Having a sound background in building-construction projects, Lingel also provides the cutting edge in technology and services.

INTERNATIONAL

Aluminum system 6.0 launched in 2017 is as per our opinion the most aesthetic Aluminium system available in India. As the design made similar to a wooden or uPVC window, we can use the complete uPVC hardware range. The options available are entrance doors, slide, and folding solutions, casement opening windows, lift and slide

INDIA

LINGEL INDIA

Lingel has spread its wings to almost every part of the country. In Northern India, the brand is working in Delhi, Gurgaon, Noida, Ludhiana, Jammu and Chandigarh. In Central India, it is present in Ahmedabad, Lucknow, Raipur, Pune, Mumbai and Nagpur. Coming to southern part, the brand has its presence in Kochi, Goa, Bengaluru, Chennai and Hyderabad. Lastly, in Northern part, the company is active in Siliguri, Kolkata, Shillong and Guwahati and Imphal. In India, Lingel maintain its standard by offering customized designing solutions for internal and external doors, windows, facility and security needs according to the Indian environment and consumer requirements of the country.

DIRECTOR'S SPEECH

Mr Mario Schmidt is the dynamic, young and energetic Managing Director of Lingel Windows for Germany and India. He is an asset to the Fenestration Industry. His extensive knowledge of the product and expertise makes him the most sought out person. His hunger to create and innovate never ends. He has won various awards and recognition. He also introduced new products. The latest innovations -Lingel 6.0 Aluminium Windows and Smart Li- windows. He has been the brainchild to create the Smart Windows that operate on wi-fi. His passion to offer the best of the products to his customers and dedication is something he wants all his team members to emulate.

“Lingel Always First” show his love and dedication for the company. He is currently the President of the UPVC Window and Door Manufacturers Association (UWDM).

AWARRDS

Lingel Windows won the Design Wall Delhi in 2016. Over 60 shortlisted brands showcased their innovation. The brands were judged on the basis of revolution, excellence and creativity by 100+ jury members. The jury comprised of leading Architects, Developers and Interior Designers. Lingel Windows was awarded the “Gold Winner”.

CASEMENT DOOR

HIGHLIGHTS

- 60mm wide section for frame and Shutter of 100mm height

DESIGNED THAT:

- heavy duty side hung window hinge **20kg**
- Glass thickness upto **36mm** openable doors

HIGHLIGHTS

- Uniform design for all the uPVC profile systems
- weathering test 8000 for all white profiles as per EN 12608
- tested corner weld strength
- colour option with renolit FX foil tested as per EN 12208 15000 Hours
- Lingel SS Grade Hardware

UPVC WINDOW & DOOR

DESIGNED THAT:

- chambers steel reinforced for required strength minimum thickness 1.5mm to 3mm

CASEMENT WINDOW

HIGHLIGHTS

- 60mm wide section for frame and Shutter
- first in Industry Z Mullion used for outside / Inside Glazing

DESIGNED THAT:

- Heavy duty Friction Hinges upto 50 Kg per panel can be fitted.
- heavy duty side hung window hinge **80kg**
- Glass thickness upto **36mm** openable doors

THREE TRACK SLIDING DOOR

HIGHLIGHTS

- starting with **112mm** wide section for frame and **40mm** shutters width & **85mm** height
- multiple number of tracks can be added
- various Mesh options from **SS304, USA** fabric Mesh and high security screen can be selected

DESIGNED THAT:

- Heavy duty rollers for weight upto **200 kg** per shutter can be used
- Glass thickness upto **24mm**

THREE TRACK SLIDING WINDOW

HIGHLIGHTS

- starting with **112mm** wide section for frame and **40mm** shutters width & **70mm** height
- multiple number of tracks can be added
- various Mesh options from **SS304, USA** fabric Mesh and high security screen can be selected

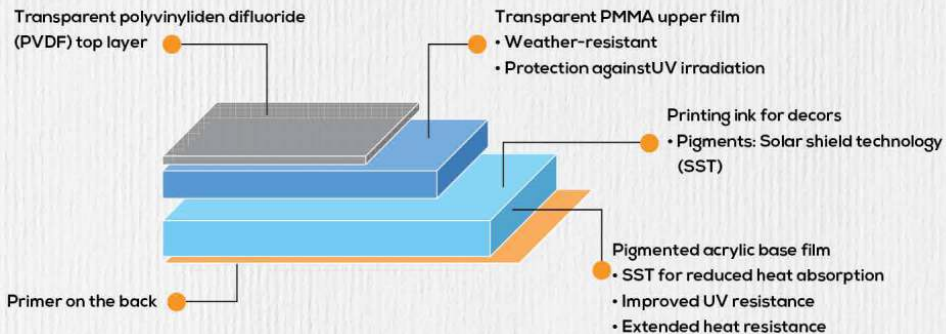

DESIGNED THAT:

- Heavy duty rollers for weight upto **120 kg** per shutter can be used
- Glass thickness upto **24mm**

RENOLIT EXOFOL FX The film for subtropical and tropical climates

- Product concept of RENOLIT EXOFOL FX • Solar Shield Technology (SST) • Comparison of climatic conditions
- Florida / Arizona: outdoor weathering stations • India • Testing of RENOLIT EXOFOL FX
- Natural weathering: Florida / Arizona • Artificial weathering: Xenotest • Summary

RENOLIT EXOFOL FX shows a new surface quality

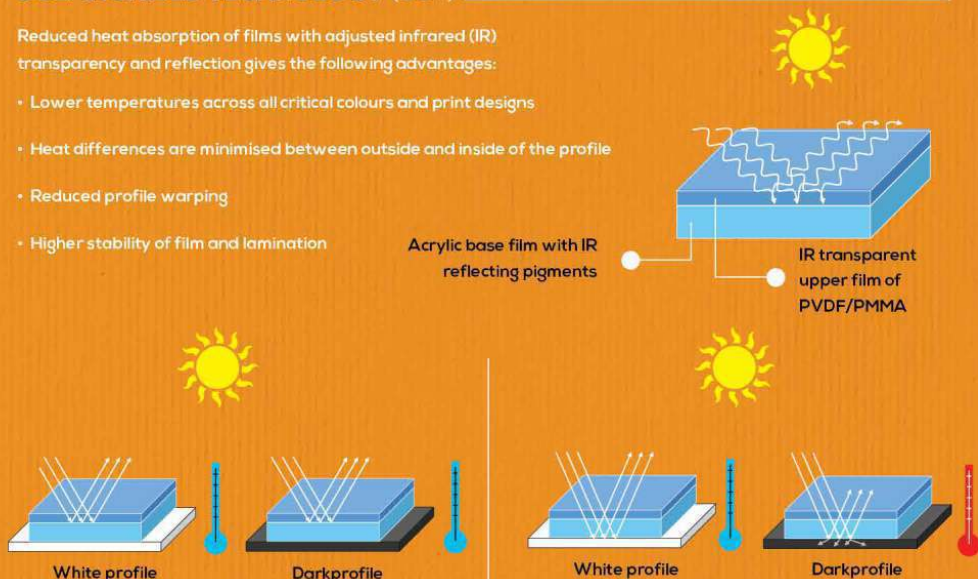

- Long-lasting • UV-protection • Low surface tension • Outstanding preservation of surface properties

The combination of the three layers of PVDF and Polyacrylates results in outstanding properties.

SOLAR SHIELD TECHNOLOGY (SST)

Reduced heat absorption of films with adjusted infrared (IR) transparency and reflection gives the following advantages:

- Lower temperatures across all critical colours and print designs
- Heat differences are minimised between outside and inside of the profile
- Reduced profile warping
- Higher stability of film and lamination

CLIMATIC CONDITIONS

Characteristics of climatic conditions of India

- High global irradiation • High humidity

Most important climatic parameters influencing the weatherability of window profile films

- Solar irradiation
- Humidity

Especially the combination of solar irradiation and humidity has a negative impact on the weatherability of PVC based films

Weathering conditions of Florida and Arizona are comparable with India.

Natural weathering results of Florida and Arizona are relevant for India

Testing of RENOLIT EXOFOL FX

- Detailed tests of films in our labs
- Internal weathering tests of each colour and decor with xenon test instruments and natural weathering
- Natural weathering by an independent test institute (Arizona/Phoenix, Florida/Miami)
- Permanent inspection of weathering resistance by Sueddeutsches Kunststoffzentrum, Würzburg (SKZ)

AKZO NOBEL powder coating surfaces

Our powder coating surfaces by Akzo Nobel creating an extreme durability while like an invisible protective shield and having a superb versatile look.

Aluminium surfaces offers high structural stability and corrosion resistance making it a perfect choice for weather protection.

Aluminium surfaces are made to last!!!

For larger requirements, a part of our standard color range we are able to provide you an almost unlimited variety of various color options.

Our partner Akzo Nobel with its powder brand Interpon, is one of the world leading surface coating provider. Under its umbrella a wide range of known brands like Sikkens & Dulux are united.

LINGEL PROJECT NO 1

RESIDENCE OF MR GOLCHA AND MRS AARTI

LOCATION : Coonoor

ARCHITECT: Mr Golcha and Mrs Aarti

PRODUCT: Lingel 6.0 Aluminium

The challenge of the project started with its location. The beautiful view of the Tea Plantation and the breath taking view one had to experience from its windows. This being the residence of ARCHITECTS which was a Masterpiece of mind and craftsmanship. The Alu system, Lingel 6.0, with all its unique features was used for the extra-large glasses with an overall glass thickness of up to 38mm. A large number of the windows are not at right angle (Model windows). Swing roof top window from Velux inbuilt into the roof tile structure.

For the roof top window, we had to tune the existing and standard European design with all standardized and pre-defined fittings into the on-site existing roof structure made out of steel. Further complicated became the fact that 3 windows had to be coupled together and along with standardized extension profiles. After the installation we had to supervise the roof tiling contractor how to attach the roof tiles next to our windows to assure the overall weather / water tightness of the unit.

If you are looking for an high-end, finest standard, sustainable , customized and value for money product then Lingel Timber Windows are the best choice for you.

You may have your personal or unique style but we will create for you a signature product that will add a wow factor to your abode.

Modern architecture - panoramic views goes hand in hand with open space and a lot of natural light. Thanks to the excellent stability and the innovative technical concepts by our Lingel-wood-line very large window spaces of any Architecture design can be easily done.

Lingel-wood-line – your new horizon – different by nature ...

With our American oak wood, has a similar property like teak wood. You can be assured the windows are 99% termite proof.

GERMAN WOOD

We propose transparent surfaces for the best natural look. We prefer to use modern coating with innovative Lignin stabilizers, allowing the perfect transparent surfaces and long durability.

A perfect merge of three different solvent-free wood glazes create a remarkably durable shield against the weather. Our wide range of colour samples will show you many options for the outer surface of your Lingel wood window.

Transparent surfaces proving the best nature look and more protection due to world's Leading coating technology.

Our windows systems are individually **"made-to-measure"** with an exquisite look and perfect stability.

WINDOW & DOOR

ALL WINDOWS ARE NOW WITH CONCEALED HARDWARE SYSTEM with weight capacity up to 50kg for casement and 100kg for tilt & turn windows a work of art with perfect mechanical functionality.

Thanks to our high quality powder coating all surfaces are completely weather resistant and will last all your life and beyond. We offer the surfaces in many different variations... **Glossy, Matte, Metallic...**

WINDOWS & DOORS

LINGEL PROJECT NO 6

THE LEELA AMBIENCE

LOCATION : Gurugram

Located in the prime area , noise pollution was a big concern at the hotel. The client's instruction was not to change or replace the outer curtain wall or the internal wood cladding. Sound proof windows were installed when the hotel was in running condition throughout the renovation work.

ROLLER SHUTTER VENETIAN BLINDS

Front mounted roller shutter & venetian blinds getting installed at the outer opening surface in front of the window. They can be installed during the installation of your new windows or can be added at any point of time later or on existing windows.

With a roller shutter or a venetian blind on your LINGEL window & doors, you can control how much daylight you let in and change the atmosphere in your residence the way you like it. You can also directly influence the indoor temperature

Our front mounted shutters & blinds are visible by design. Architects and decorators have found this to be a great opportunity to provide the personal signature for your home. The shutter box as well and the rails can be powder coated in a variety of colors to add new accents to your facade and give your home a new look.

WINDOW & DOOR

ROLLER SHUTTER & VENETIAN BLINDS

Unique design elements for your building individually colored as per your choice to fit in your architecture as special fenestration and facades elements.

- YOUR PERSONAL ENERGY SAVER
- EFFECTIVE PROTECTION AGAINST UNINVITED GUEST (BURGLAR)
- INTELLIGENT, CAN BE FULLY AUTOMATABLE SYSTEMS

ROLLER SHUTTERS:

- KEEPS OUT NOISE FROM OUTSIDE
- INSECT SHIELD AGAINST UNWELCOMED INSECTS.
- THEY ALSO OFFER EFFECTIVE PROTECTION AGAINST BAD WEATHER.

VENETIAN BLINDS:

The individually adjustable slat angle provided at all venetian blinds enables you both to control the incidence of sunlight how you want to and to protect against prying eyes.

Our front-mounted roller shutters are installed on the façade or stand out and make a visual statement. Both in new buildings and for retrofitting, they noticeably curb energy losses.

Keeping all those great value additions in mind, In Europe today, it's difficult to imagine windows without roller shutter or blinds. It's time to evaluate the superior flexibility and functionality of roller shutters compared to traditional curtains

Mounted roller shutters are available with three different methods of operation:

- BELT (ALSO CALLED TAPE)
- HAND CRANK VIA CRANK ROD / SPINDLE
- ELECTRIC MOTOR

MOTOR AND SPINDLE OPERATED

- MAX HEIGHT 3300MM
- IDEAL FIELD SIZE IN WIDTH BY MAX HEIGHT = 1800MM
- FOR 8 FEET HEIGHT DOORS THE WIDTH CAN BE UP TO 10 FEET PER FIELD

GLASS HOUSE & CONSERVATORY

Glass House & Conservatory

Adding a modern conservatory to your home is proven to increase the worth of your property significantly.

It's a popular choice to add light and space to your home. Choose a style that blends with your existing decor and let your interior design get the exquisite look.

Our Lingel conservatory is the most beautiful & Stylish. It creates an airy part for the house, perfect for reading, eating and lounging in the sunlight. It's a way to feel like you're experiencing the outdoors, even when the weather isn't up to the mark, and for making the most of any sunshine on a winter's day.

Adding a conservatory to your house adds much-needed extra space and natural light to small spaces and make for a brilliant place in which to grow plants. We've rounded up our favorite glass houses, sun-rooms and conservatory styles from our archives, so you can be inspired to set up your very own room with a view.

A part of the design and aesthetic elements each Lingel conservatory is an individual master piece in itself. It is technically unique, strong, weather and hurricane proof up to 2KN. Our German engineering makes it possible to provide you your personal lifetime investment as per your choice and budget.
